Keyboard Specifications

Product Model: GK82

System: Windows 7/8/10/11/Mac

Dimensions: 35 x 13.3 x 3.7 cm | 13.8 x 5.2 x 1.4 inches

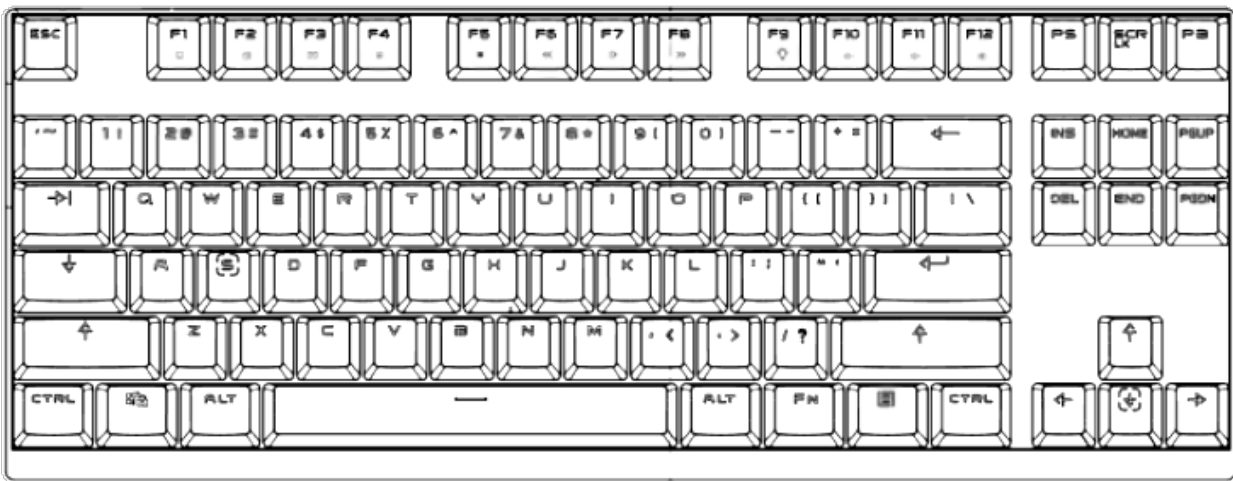

Weight: 0.71 kg | 1.56 pounds

Power: USB type C wired and 2.4G wireless with dongle

Type: High Keycap Staircase Design

Number of Keys: 87

Colour: Pink/Black

FN+F1 = Computer

FN+F2 = URL

FN+F3 = Mail

FN+F4 = Calculator

FN+F5 = Stop

FN+F6 = Previous Song

FN+F7 = Pause/Play

FN+F8 = Next Song

FN+F9 = Lighting Effects

FN+F10 = Volume Decrease

FN+F11 = Volume Increase

FN+F12 = Mute

Note For Mac Users

Only the stop, song control, volume control and mute functions will work using the above FN key combinations.

2.4G First Connection

To connect using 2.4G wireless for the first time, insert the dongle into the USB port and hold the ESC key for at least three seconds to search for the device. A blue light will appear under the caps lock key until a connection is made. Pairing mode will stay active for 10 seconds before shutting off.

Lighting Options

The Motospeed Synopsis GK82 Gaming Keyboard supports six different lighting effects in white light which can be accessed by pressing FN+F9.

Always On

This mode is the default mode when turning on the keyboard for the first time.

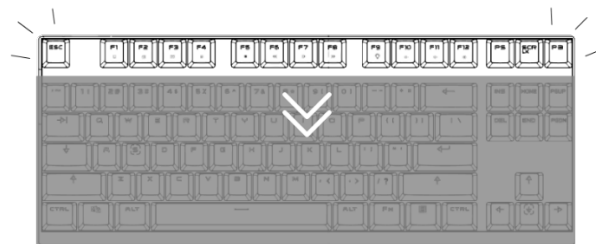

Horizontal Streamer

Each column of the keyboard lights up from left to right.

Vertical Streamer

Each row of the keyboard lights up from top to bottom.

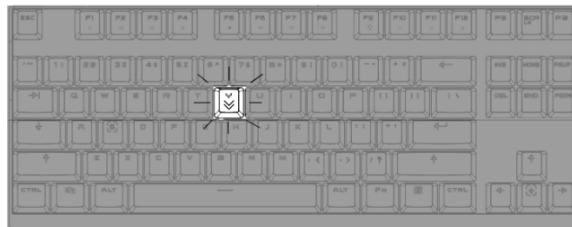

Gradual Brightening

The keyboard will light up gradually one key at a time from top to bottom and left to right.

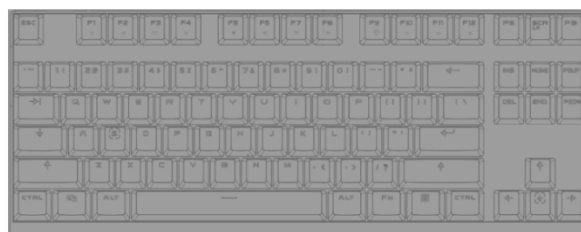

Light On Press

Keys only light up when pressed.

No Light

The keyboard will not light up at all.

Power and Charging

The Motospeed GK82 Synopsis Gaming Keyboard can connect to devices using a type-C USB wired cable as well as a 2.4G wireless dongle, which are both included.

Using Wired Mode

The keyboard can automatically be used as a wired keyboard by connecting it to a laptop or computer using the type-C USB wire cable.

Wireless Battery Length

In wireless mode with a lighting effect turned on, the battery will last approximately 50 hours of intermittent use.

With the backlight turned off, the battery will last approximately 500 hours of intermittent use.

Please note that the backlight automatically enters sleep mode after one minute of inactivity.

Low Battery Indicator

When the keyboard is in low battery in wireless mode, a blue light will start flashing underneath the caps lock key.

After connecting the keyboard to a power source using the type-C USB cable, a red light will indicate charging mode underneath the ESC key and will remain lit until charging is complete.

Troubleshooting

If the keyboard does not connect to the computer please try the following:

Ensure proper USB connection

Ensure that the type-C USB cable and the 2.4G wireless dongle are fully inserted into the computer's USB port and not loose.

Restart the computer

The keyboard may be experiencing a technical issue that can be resolved by restarting the computer.

Connect the keyboard to another USB port

There may be a mechanical malfunction with the USB port, please try connecting to another port.

Update or rollback drivers

Depending on your computer system, updating the keyboard drivers may be required to ensure the full functionality of the keyboard. Please check with your manufacturer on how this process is completed.

If the keyboard stops functioning after a driver update, you may need to roll back your driver. Please check with your manufacturer on how this process is completed.
